

Case Study

RS115 | Charlestown

Project: Traffic Signal Posts, Charlestown, Dublin, Ireland

Product: RS115df sockets

RS115 | Charlestown...

All major junctions serving the Charlestown shopping centre off the M50 motorway in north Dublin use RS115 sockets for the installation and maintenance of traffic signals. A significant feature in the planning and continued development of this busy commercial and residential area is ease of access and a congestion free road network. IPL group's RETENTION SYSTEM™ delivers practical, efficient and sustainable infrastructure design. RS socket foundations bring improved road network management and low-cost maintenance where damaged posts are quickly replaced without excavation ensuring minimum traffic disruption.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission.
