

Case Study

RS76 | Worcester

Project: Bollards, Worcester, Worcestershire, England
Product: RS76 sockets

RS76 | Worcester...

In a damage prevention measure of critical infrastructure, Worcestershire County Council use a combination of IPL group security bollards installed in RS76 sockets around vulnerable traffic signal controller cabinets. In several locations the cabinets are prone to vehicle impact damage and the bollards are used as a protective barrier. Subsequently these bollards are regularly damaged, however since they are installed in RETENTION SYSTEM™ sockets, they are easily and routinely maintained and replaced — within minutes and without further excavation — minimising disruption and costs.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com
